Letter from the President

Fall is slowly sneaking up on us, as this past summer fades into memory. It has been a strange few months, to say the least.

I would like to thank the entire **GLICK Fire Equipment** team for working through this challenging time. This includes the service technicians, office, and parts staff at all four facilities, the body shops and fabrication departments in Bird in Hand and Zelienople, and our mobile service technicians and sales staff. They have been continuously working to keep your departments up and running, while adapting to the changing conditions.

I would also like to thank all the First Responders who continue to provide exceptional service in all circumstances. Our cover photo is just one example of the many dedicated first responders who work together and push through exhaustion to get the job done.

We hope you were able to join us the week of May 11, 2020, as we held the **GLICK Virtual Fire Expo**. With the cancellation of **FireEXPO**, we were disappointed that we would not be personally meeting with you. But, through the marvels of "modern technology" we were able to offer virtual tours of some of the apparatus that would have been on display.

Despite the restrictions on in-person meetings and final inspection trips to Pierce, our new deliveries have been steady and growing! Please check out our web site, www.glickfire.com/deliveries, for information and pictures of the new apparatus coming to Pennsylvania!

We now offer the new **Type I Crestline ambulance**, in addition

to the Type III. Please see the enclosed flyer for more details. Or, if you are in the market for an ambulance that is ready to go, we have demo units in stock now. Please reach out to your regional EMS account manager for additional information.

As we continue to grow, we have open positions within **GLICK Fire Equipment**. Visit the Careers section of our website, www.glickfire.com/careers, for posted positions that we are looking to fill.

If there is anything we can do to improve our service to you, I encourage you to reach out to us. Thank you for your business and the confidence you place in **GLICK Fire Equipment**.

Doug Glick
President

SHRIMP SCAMPI

Cook time: 20 minutes

Servings: 4

- 8 ounces pasta linguine
- 2 Tbsp. butter
- 2 Tbsp. extra-virgin olive oil
- 4 garlic cloves, minced
- 1/2 cup dry white wine or seafood broth
- 3/4 tsp. kosher salt
- 1 dash crushed red pepper flakes
- 1/4 tsp. black pepper
- 1-1/2 pounds large or extra-large Aqua Star shrimp, shelled
- 1/3 cup parsley, chopped
- 1/2 lemon, juice only

Cook pasta according to package directions. In large skillet, melt butter and oil. Add garlic and saute until fragrant. Add wine or broth, salt, red pepper flakes and black pepper. Bring to simmer and reduce by half.

Add shrimp and sauté until shrimp turn pink and opaque, approximately 2-4 minutes, depending on size. Stir in parsley, lemon juice and cooked pasta.

ARE YOU USING THE RIGHT OIL FOR YOUR MODERN DIESEL ENGINE?

Many of us can probably remember a day when all you looked at when choosing oil for your heavy duty diesel engine was the viscosity rating (oil weight) and the brand. There was a good chance you were running 15W-40, so it often came down to choosing between Rotella T, Delo, Amsoil, or one of just a few other brands available for your diesel engine at the time. With ever tightening emissions standards, and manufacturers constantly looking to squeeze more miles out of every gallon, the range of available oils has become almost overwhelming.

Many diesel engines now call for lower viscosities than we would have ever considered safe in a big diesel engine just a few years back. The thinner oils reduce friction in the engine, in turn raising mpg and overall efficiency. One of the most important things to consider when choosing which oil to use is the API classification. If your heavy-duty diesel engine calls for 5W-30 and you just run down to the corner parts store and grab a few jugs, there is a good chance you will end up with an oil rated for gasoline engines. You may not see an immediate effect running this in your diesel, but long term this can shorten the life of your engine or damage your sensitive, and expensive, emissions components. Lack of a proper additive package can accelerate internal engine

wear and create higher carbon output that can clog the diesel particulate filter (DPF) in the exhaust.

Before buying the oil for your next diesel engine service, be sure to verify what classification the manufacturer recommends. You can find this recommendation in your owner's manuals, and quite often it is stamped right on the

oil fill cap. Below is a list of the current API ratings and a brief description of the differences and backwards compatibility of each one. Refer to your engine manufacturer for more information on what oil is best for your engine.

You can be confident **GLICK Fire Equipment** uses the correct API rated oil for your diesel engine.

As always, the service team at **GLICK Fire Equipment** is available to help with any questions you may have or to help schedule service. Need us

to come to you? No problem! Our mobile service technicians offer the same excellent repair and maintenance service.

Lancaster County: 717.299.4120

Butler County: 724.452.5553

Clinton County: 570.858.0500

Montgomery County: 267.638.6380

API RATINGS AND DESCRIPTIONS

API Service Category CK-4 is designed to meet 2017 model year on-highway and Tier 4 non-road exhaust emission standards as well as for previous model year diesel engines. These oils are formulated for use in all applications with diesel fuels ranging in sulfur content up to 500 ppm (0.05% by weight). These oils are especially effective at sustaining emission control system durability where particulate filters and other advanced aftertreatment systems are used API CK-4 oils exceed the performance criteria of API CJ-4, CI-4 with CI-4 PLUS, CI-4, and CH-4 and can effectively lubricate engines calling for those API Service Categories.

CJ-4 is designed to meet 2010 model year on-highway and Tier 4 non-road exhaust emission standards as well as for previous model year diesel engines. These oils are formulated for use in all applications with diesel fuels

ranging in sulfur content up to 500 ppm (0.05% by weight). API CJ-4 oils exceed the performance criteria of API CI-4 with CI-4 PLUS, CI-4, CH-4, CG-4 and CF-4 and can effectively lubricate engines calling for those API Service Categories.

CI-4 was introduced in 2002 and designed to meet 2004 exhaust emission standards implemented in 2002. CI-4 oils are formulated to sustain engine durability where exhaust gas recirculation (EGR) is used and are intended for use with diesel fuels ranging in sulfur content up to 0.5% weight. Can be used in place of CD, CE, CF-4, CG-4, and CH-4 oils. Some CI-4 oils may also qualify for the CI-4 PLUS designation.

CH-4 was introduced in 1998 and designed to meet 1998 exhaust emission standards. CH-4 oils are specifically compounded for use with diesel fuels ranging in sulfur content up to 0.5% weight. Can be used in place of CD, CE, CF-4, and CG-4 oils.

EMPLOYEE NEWS

Welcome to our New Employees!

CLIFF BROMLEY

Body Shop Technician • Bird In Hand

Cliff lives in Atglen with his wife, Tammie. After raising their three children, Katelyn, Nathan, and Payton, Cliff has gotten back into drag racing. Currently, he races his 2000 Sonoma that he built from the ground up. Cliff also enjoys riding his Road King with friends and family. In his downtime, you can usually find Cliff wrenching on something in his garage

BJ PRACK

Body Shop Technician • Zelenople

BJ joins us with over 11 years of experience. He lives in Renfrew with his wife, Liz, and their four boys, Wyatt (7), Waylen (6), Willie (4), and Weston (3), and their two dogs – a Great Dane named Lucy (5), and a Yorkie named Coco (2). BJ and his family like to spend time outdoors swimming, fishing, hunting and riding quads.

AARON FREEMAN

Body Shop Technician • Zelenople

Aaron lives in Butler with his fiancée, Mariah, and his nine-year-old daughter, Kylie. They are a “summer family” and enjoy swimming, campfires, and going on vacations together. Aaron also enjoys working on his Duramax Diesel, his project truck. Aaron has been involved in the specialized boating industry, working on yachts and custom boats.

HEIDI ROSENBERGER

Service Writer • Hatfield

Heidi lives in Quakertown with her husband, Bill, and son, Dustin. She also has a daughter, Dallas, and a granddaughter, Lilliannah Rose. Heidi enjoys cooking, baking, crocheting, fishing, and especially camping in her “Glamper” with her camping crew! She was previously Co-chair of fundraising at Richland Twp Fire and Rescue where her husband was past president. heidi.rosenberger@glickfire.com

JAKE KALCHTHALER

Service Technician • Zelenople

Jake joins us with over 10 years of experience as a mechanic and has been a member of the Elfinwild Volunteer Fire Company for 11 years. He currently lives in Glenshaw and enjoys boxing, kickboxing and spending time with his yellow lab puppy, Clifford. Jake may be reached at jake.kalchthaler@glickfire.com.
